

Pope Francis Action Team- Interview Mr. Sharma

The Pope Francis Action Team Interview Mr Sharma our local MP
Friday 4th November 2022

What environmental issues do you care the most about?

Climate change includes flooding, forest fires and ice melting. If everyone works together, we can make a difference to protect the environment but everyone has to act not just one person.

How can people improve the environment that we live in?

Everyone can protect the environment by not littering, spitting on the pavement, save electricity because this is having a huge impact on the area. We do not have to use our cars every day and we do not have to drop litter especially when we have litterbins to use.

What can you do personally to reduce your carbon footprint? I rarely use my car and use public transport. There are too many cars on the road and the air is being polluted.

If global warming continues, what will happen in the future? If we do not work together then the destruction of the planet will happen. We have one planet and we need to take care it because we are contributing to it by polluting the skies and our environment. We cannot leave others to do it everyone needs to help make a change.

Are you concerned about climate change? Yes, I am concerned about climate change and want to protect it. We all need to try, and stop climate change and create a better future for the planet.

Should governments be solely responsible for protecting the environment? It is not just the Government who should act, it is everyone. The public and the government work together to raise awareness. It is everyone's responsibility to protect the environment and everyone needs to contribute.

What changes in the weather might we see in the future? We may see no more snow, extreme heat wave, winter turning into a summer or there may be many more floods.
