Landfill

Recycling

## Pope Francis Action Team Recycling Presentation

Litter and landfill can harm wildlife.

Landfill can pollute water and earth.

We only have so much material we can use.

We don't have unlimited trees to use as materials or fuel.

# Why does recycling matter?

## Pope Francis Action Team Recycling Presentation

Recycling is sorted into glass, paper, plastic or metal.

Materials are broken down into small parts.

New things are made from the broken down pieces.

# How are items recycled?
