Pope Francis Action Team

Dear Deacon Tito,

I am writing to you on behalf of the Pope Francis Action Team who today convened this morning to discuss current issues that pupils at your school have concerns about. As the spokesperson for each class representative on the Pope Francis Action Team, I would like to bring to your attention the overriding point that was made by various pupils at the meeting. This concerns the grass area at the bottom of the playground that is in a state of disrepair. The holes need filling and grass seeds need to be put down. It was noted this morning that the children thought it was a hazardous area as a number of pupils have fallen and hurt themselves especially when there has been rain fall as the mud is very slippery.

Children across all age groups commented that if the area was improved with an alternative ground and perhaps a sail would provide shade but also stop people from the nearby flats peering in. We would like to enjoy the area and would like to work with you so that in time the pupils of St. Anselm's will be able to have a more pleasurable playground experience and enhance the curriculum as it could be used for science investigations and art.

In conclusion, I would appreciate it if our suggestions would be noted and perhaps arrange a meeting to discuss this further whenever you are available.

Yours faithfully,

Aaron & Lyiana
Chairperson/Secretary
